

HII/Embassy Partial Burial Notice

Any HII or Embassy pool approved to be buried up to 24" while backfilling with dirt, must have a proper water diversion plan put in place. Water diversion plan means that ALL water, both topical and ground water are diverted away from the pool at all times. Pool collapse due to improper burial or unstable soil conditions is not covered under warranty. Burial at any depth over 24" will void the warranty. If there is any question regarding the stability of the soil to be used as backfill, the pool should not be buried. Customer assumes all responsibility for proper installation.

Cordially,
