LED Waterfall

Featuring Strong's Exclusive Patented DURA-LAST™ Cabinet System with a Lifetime Warranty!

A simple repair can be costly when spa components are buried in foam insulation. Imagine a car with the hood welded shut! Strong's acrylic spas afford easy 360° access for routine maintenance by providing energy-efficient perimeter insulation options, including our patented, dual-walled DURA-LAST™ cabinet system.

- Insulated Double-Walled Construction. Proprietary foam insulation is sealed between resin walls, meaning easy access to spa components!
- Pump Heat Recycled/Reuse within cabinet air space for energy savings!
- Passed the rigorous California Energy Commission (CEC) Efficiency Test
- Insulated, integrated DURA-BASE™ 10x thicker than standard bases.
